

## Greenwich Public Schools, On-Call Services Greenwich, CT

**Greenwich Public Schools** services began with district-wide Existing Conditions Surveys for one (1) High School, three (3) Middle Schools, and eleven (11) Elementary Schools. The result of this study was a comprehensive existing conditions report for each school, and a 10-year strategic capital plan to address deficiencies outlined in the Existing Conditions Surveys. We completed capital projects for every school in the District including, +/-75% of the Districts roofs, two complete window replacements, multiple bathroom renovations, gymnasium/locker reconstruction, boiler plants and heating systems, theatrical lighting, site improvements, space and utilization feasibility studies, and restoration of the Districts Observatory.
