

Menorah Pediatric Hospice, Brooklyn, NY

Menorah Pediatric Hospice is located on an oceanfront campus for a residential healthcare facility campus located at 1516 Oriental Boulevard, Brooklyn, NY. This unique hospice inpatient residence is the first in NYC to care for vulnerable children as well as adults. It has its own on-grade access, and playground vestibule and lobby. The 16-bed hospice inpatient residence of 16,000 square feet is located on the fourth floor of an existing 1977 brick building that had been vacated. The four story building has been fully reconstructed including building a new envelope with a curtain wall facade, adding a separate entrance for the hospice at grade and a children's playground.

Though the balance of the campus provides central services, it is independent in both its entrance as well as its own dedicated vertical circulation. The central philosophy of this new residence is to offer superior private settings for the patients of patients from infancy to adulthood, as well as a range of space and support services for their families. To support this goal, 16 private suites (520 square feet each) with accommodations for family/guests to remain overnight, have been designed. Each of the suites has a bedroom for the resident patient, a family bedroom and bath and a kitchen dining area. The purpose is to provide a home like setting for end of life care for the residents, as well as for their family members including their young siblings.
