

## The New Jewish Home, Bronx, NY

The creation of a new 130 client Adult Day Health Center in the Bronx is all about “living a better day.” The program is a wonderful alternative to institutional living to support families and caretakers in maintaining their family member at home.

Housed at a corporate office campus near a college, hotels, corporate offices, and amenities, this new destination is intended to offer an oasis. Within the oasis are four dining venues, fitness and physical therapy, computer classes, art, cooking, gardening and recreation.

There are also two specialties: a memory care center within the program and a short-term rest area for clients with unique sleep patterns.

For a day, afternoon or evening away from home, this provides variety, intensity, respite and stimulation in a state of the art center. The motto for the New Jewish Home is “age like a New Yorker,” and the 2018 center radiates such energy.
